Breast cancer is the most frequently diagnosed cancer among women in the United States, after skin cancer, accounting for nearly 1 in 3 cancers diagnosed in U.S. women. It is the second leading cause of cancer mortality after lung cancer, representing 15% of all female cancer deaths. In 2008, it was estimated that 40,000 women died from breast cancer in the U.S., that same figure is breast cancer's mortality estimate for 2009.
